- 1. Classes at Linden University in Berlin will close ten days before Thitsunday, at which time all rooms at the university which can be made available will be prepared as living space for FDJ visitors to Berlin. Approximately 15,000 university students (almost the total number registered in the Mast Zone) are expected to take part in the Berlin march, for which they will be provided with specially cut uniforms of white material. Buch uniforms have already been delivered to two faculties at Linden University.
- 2. All medical students in the university have been told that during this period they will undergo an "internship", in which they will be held available as medical reserve units for emergency service, on a 24-hour basis. The internship is scheduled to begin on 1 May. This announcement has strengthened opinion in the student body that FDJ public statements to the contrary, the SED leadership envisages at least some conflict during the demonstrations, in which FDJ "mertyrs" will be created.
- 3. Student attention has recently centered on a former naval officer, Freiherr von eitzenstein, who appears frequently at lectures in all the faculties, although he is not a regular student at the university. Allegedly he plays a role as the representative of Soviet interest in connection with the whitsunday preparations.
- 4. In order to ensure the rapid unloading of FDJ visitors arriving in Berlin by rail, special tracks have been laid from the Stettin Bahnhof to the Bahnhofsplatz, on which four trains can be emptied simultaneously.
